INTRODUCTION

The immediate post-devolution period has led to some speculation on the performance of the devolved health services under local government supervision. A feared "information gap" with the inability of inexperienced local governments to submit reports loomed on the horizon as well.

Now, the Department of Health's Health Intelligence Service (HIS) would like to put all those fears to rest with the publication of this 1995 Field Health Service Information System Annual Report. This report is due in large part to the continuing efforts of health workers nationwide under sometimes difficult circumstances to carry on with health work. More particularly, FHSIS continues to be supported through the untiring efforts of regional coordinators and HIS central office staff since its inception and even through the initial difficult years after devolution.

This publication heralds the renewed effort of HIS to make available relevant and timely information for all workers concerned with health planning. This 1995 annual report is also the last report under the unmodified FHSIS. The 1996 annual report will be under the modified FHSIS (a draft of which was circulated last April, 1997).

This annual FHSIS report and the succeeding ones shall constitute the operational report of government health services nationwide. In 1997 two reports will be issued (1995 and 1996) by HIS. Annually, HIS shall continue to publish the *Philippine Health Statistics (PHS)* which is usually three to four years behind the FHSIS annual reports due to the cycle of statistical reports. Any gaps noted in this report will eventually be corrected by the PHS.

This publication will also be enriched by the comments, suggestions and improvements by its readers. Please address all such contributions to the Director, HIS.
