## Message from the Secretary

The Department of Health (DOH) is proud to present the 2005 Field Health Service Information System (FHSIS) Annual Report. It is a nationwide compilation of data that provides information on the different public health programs which are presented by province, city and region. These data are useful for planning, monitoring and evaluating health programs such as Family Planning, Maternal and Child Health, Nutrition, Communicable Disease, Environmental and Dental Health.

This report could not have been possible without the participation and support of local health workers at the Barangay, Municipal, City and Provincial levels and the staff from regional health offices. We thank them for their continued cooperation with the Department of Health in coming up with timely and quality health data that are vital instruments in making informed health policy decisions. It is hoped that this report will continue to guide our health leaders, policy makers and program managers in the effective planning, implementation, monitoring and evaluation of our priority health programs.
