# **Beat COVID-19 Today**

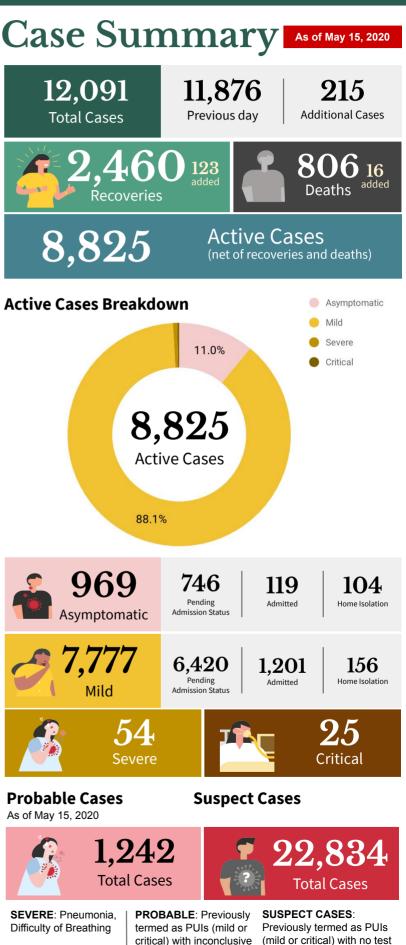

A COVID-19 Philippine Situationer

Issue 19 | May 16, 2020

### Highlights and Recent **Updates on COVID-19**

- DOH recorded 8,825 active cases as of May • 15, with majority of the patients exhibiting mild symptoms (7,777; 88.1%).
- Thirty (30) licensed laboratories across the country are now equipped to perform the RT-PCR test for COVID-19 while five (5) laboratories are licensed to perform COVID-19 testing using GeneXpert cartridges.
- Overall capacity to manage and admit COVID-19 patients is still sufficient with more than 50% beds and mechanical ventilators in ICU, isolation, and COVID wards available based on information gathered from DOHDataCollectApp.
- Dr. Michael Tan of UP Diliman College of Social Sciences and Philosophy emphasized the need for Filipinos to learn proper behavior when it comes to coughing, sneezing, spitting, and socializing in order to avoid the spread of COVID-19 in social settings. On the other hand, as students and faculty prepare for the new normal brought about by the COVID-19 pandemic, Dr. Tan urged the country's telcos to offer student internet plans.
- DOH urges the public to remain vigilant about their health and practice handwashing, physical distancing, wearing of face masks, and cough etiquette as part of their lifestyle.
- With the ECQ coming to an end, DOH issued Department Memorandum 2020-0220 or Interim Guidelines on the Return-to-Work to provide guidance to all employers and returning employees in preventing, controlling, and reducing infection in the workplace.

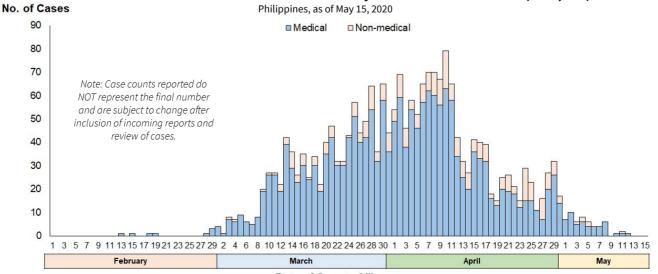

**CRITICAL:** Intubated

critical) with inconclusive or unofficial test results. done or awaiting test results.

## **Goal: Shortening Duration of Infectiousness**

Healthcare Workers with confirmed COVID-19 by Date of Onset of Illness (N= 2,099)

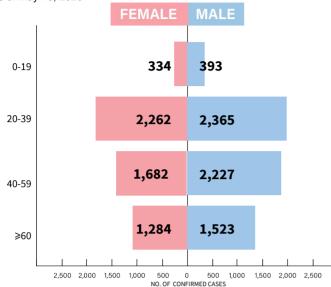

Date of Onset of Illness

## **Goal: Shortening Duration of Infectiousness**

#### Age and Sex Distribution of confirmed cases

Most of the confirmed cases are Male (6521 or 54%). Most cases are within the 20-39 age group. Twenty-one cases with unspecified age are included in the total.

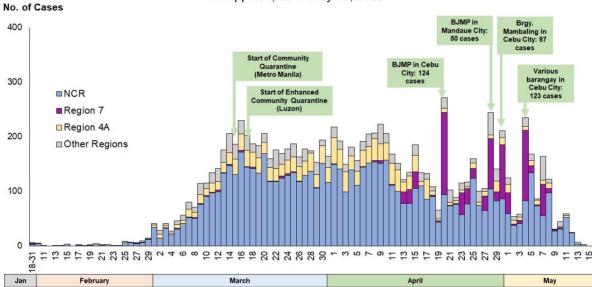

Average hospital length of stay for recovered patients is at 15 days.

A total of 433 (54%) deaths had known comorbidities: top 2 comorbidities are hypertension (268 or 62%) and diabetes (203 or 47%).

Philippines, as of May 15, 2020

Date of Onset of Illness

Abra	Cotabato	Quirino
Agusan del Sur	Davao Occidental	Sarangani
Aklan	Davao Oriental	Siquijor
Apayao	Dinagat Islands	Sorsogon*
Aurora	Eastern Samar	South Cotabato
Basilan	Ilocos Norte	Southern Leyte
Batanes	Ilocos Sur	Surigao del Norte
Biliran	Kalinga	Surigao del Sur
Bukidnon	Maguindanao	Tawi-tawi
Camarines Norte	Masbate	Zambales
Camiguin	Mountain Province	Zamboanga del Norte
Capiz	Negros Oriental	Zamboanga Sibugay
Compostela Valley	Northern Samar	
	Pangasinan	

Provinces in **bold** letters never had a recorded case since the outbreak started.

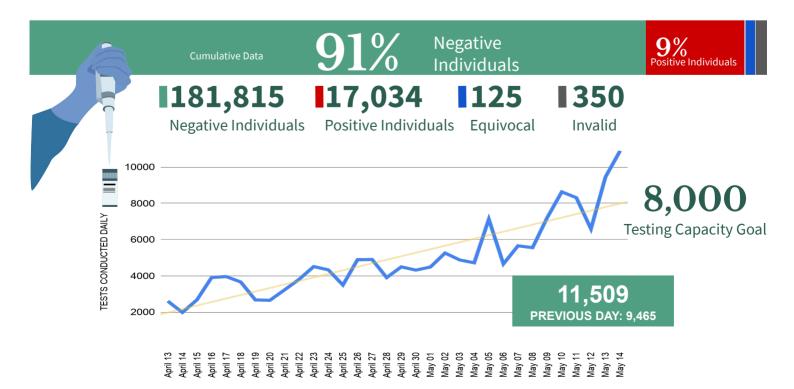

\* Sorsogon PHO reported 1 confirmed case on May 14, but case is not found in the COVID Information System as of May 15.

Based on reported address per Epidemiology Bureau.

#### INDIVIDUALS TESTED AS REPORTED BY COVID-19 LABORATORIES As of May 14, 2020

Note: The results of reported laboratory positive individuals are undergoing case information, validation, and processing and may not be reflected on the official case summary of the day. Disclaimer: Data for May 15 and May 16 pending release as they undergo validation.

## Goal: Increase Resilience, Stop Transmission, Reduce Contact

#### **BEHAVIORAL MESSAGES OF THE DAY**

As of May 15, 2020

- While repatriates are under guarantine, providing them with appropriate health messages is important to avoid unnecessary panic and ensure timely seeking of appropriate care when developing symptoms.
- ECQs, GCQs, and modified CQs are all guarantine measures with respective guidelines to follow. People should adhere to these guidelines to minimize the risk of exposure. War C is still not over even in areas where ECQ is already lifted, hence communities are encouraged to adhere to the new normal in their daily lives: always wear face masks, practice hand hygiene and proper coughing manners, and maintain physical distancing.
- As the country ushers in the New Normal, everyone is advised to stay at home and cancel non-essential travel to help slow the spread of COVID-19. Be responsible and follow the government guidelines.
- Even during the transition to New Normal era, relevant health concerns should also be prioritized. In light of the Safe Motherhood Week 2020, postnatal period is a critical phase in the lives of mothers and newborn babies where most maternal and infant deaths occur during this time due to complications. Visit your health care provider or go to the nearest health center and have your postnatal care planned and scheduled.

WHEN DO I CONTACT THE BARANGAY HEALTH **EMERGENCY RESPONSE TEAM (BHERT)?** 

These are the SEVERE SYMPTOMS you need to watch out for:

Difficulty breathing

Persistent pain or pressure in the chest

Drowsiness and/or difficulty waking up

Pale, bluish face and lips

In case you experience any of the following severe symptoms, call your **Barangay Health Emergency Response** Team (BHERT) immediately. They will refer you to the appropriate facility close to your residence.
