BEHAVIORAL MESSAGES OF THE DAY

- As the country ushers into the New Normal era, minimum health standards are essential to keep everyone healthy and safe. The government is continuously reminding the public to follow simple precautions that would reduce exposure to COVID-19 like wearing face masks at all times, maintaining physical distancing, and practicing hand hygiene and proper cough manners. Do this not just for yourselves, but also for the safety of your family and the community.
- In the [office/workplace settings](#), before entering the workplace, employees/workers should see to it that they are screened for symptoms. All should maintain physical distancing or a 1-meter distance from others, always wear face masks, and practice hand hygiene and proper coughing manners. The workplace must be regularly disinfected, especially regularly used objects such as keyboards and doorknobs.
- It is advised that you remove your shoes when you enter your house, wash your hands with soap and water, and immediately change clothes or take a bath when you return home from work. [Separate dirty clothes](#), don't shake it to minimize the possibility of dispersing the virus through the air. Wash items with detergent and bleach, using the warmest appropriate water setting and dry items completely — both steps help kill the virus.
