BEHAVIORAL MESSAGES OF THE DAY

As of June 11, 2020

- Parents should discuss COVID-19 with their children using honest language to ease up their fear and anxiety. In times of crisis, it is common for children to seek more attention and be demanding on parents. Children also often observe parents' behaviours and emotions and derive from these for ways to manage their own emotions. Keep them close and share simple facts about what is going on.
- At all times, parents should respond to their child's reaction in a supportive gentle way by listening to them, giving them affection, not being judgemental, and being aware that children respond to stress in various ways like being clingy, anxious, fearful, agitated or even bedwetting. Be open to seek help from a mental health professional if your child's behaviour is overwhelming. If in need of a professional who can talk about your child's mental health, do not hesitate to call the National Center for Mental Health 24/7 Crisis Hotline hotspots 1553 and Philippine Red Cross 24/7 toll-free Suicide Prevention HOPELINE 2919 (for Globe & TM Subscribers) and 0917558 4673 or 804467.
- As the country ushers into the New Normal era, minimum health standards are essential to keep everyone healthy and safe. It is advised to designate a person that will go to groceries, wet markets, or retail stores. Plan or make a list of what you are going to buy to help minimize your time in the grocery store or market. Wear face mask at all times, maintain physical distancing, and avoid touching products that you will not buy. Clean your hands with soap and water or alcohol-based sanitizers before and after going to the grocery store or market.
