BEHAVIORAL MESSAGES OF THE DAY

As of June 13, 2020

- As the country ushers into the New Normal era, minimum health standards are essential to keep everyone healthy and safe. Preventive measures should now be regularly practiced. These include regular handwashing, proper coughing manners, physical distancing, and wearing face masks outside.
- In the New Normal era, everyone should maintain a healthy lifestyle by preparing nutritious meals and exercising regularly.
- To emphasize the importance of disinfection, the public is reminded that the virus can stay on hard surfaces for up to 72 hours, including high-touch surfaces such as doorknobs, handrails, and phones. To reduce this risk, everyone is advised to disinfect surfaces, avoid touching objects especially in public, observe hand hygiene, and refraining from touching one's eyes, nose, and mouth.
- Everyone is enjoined in appreciating and applauding frontline health care workers, and people must recognize that the HCWs themselves have emotions and limitations—they should not have to face discrimination.

HOW DO YOU REMAIN SAFE AND HEALTHY AMIDST THE COVID-19 PANDEMIC?

ALWAYS remember and practice the following:

Wash hands with soap and water for 20 seconds or more (Try singing the chorus of your favorite song while washing).

Use a hand sanitizer with 70% alcohol if you can't wash your hands for 20 seconds or more.

Avoid touching your face, especially your mouth, eyes, nose.

Make sure you keep 1 meter distance from other people.

Avoid touching things that many people touch like door handles, tables, chairs, etc.

Wear a mask while outside.

Frequently clean surfaces in your house, work or business. This includes tables, doorknobs, light switches, countertops, handles, desks, phones, keys, keyboards, toilets, faucets, and sinks.

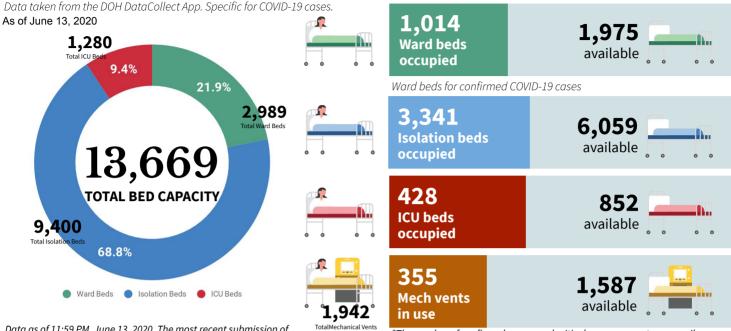

Disinfect using a bleach solution (7 tablespoons [100 mL] bleach for 1 liter of clean water).

Disinfect your most used things (like phone, keys, eyeglasses, keyboard, etc.) with 70% alcohol solution.

Goal: Enhance quality, consistency, and affordability of care provision

HOSPITAL BEDS AND MECHANICAL VENTILATORS DEDICATED TO COVID-19 CASES

Data as of 11:59 PM, June 13, 2020. The most recent submission of the facility was included in the analysis. The overall submission rate is 99.5% for hospitals and 99.5% for infirmaries.

*The number of confirmed severe and critical cases may not necessarily correspond to occupancy of ICU beds and usage of mechanical ventilators, as suspect and probable cases in severe or critical condition also utilize these resources.
