**Notes.**

1. The DOH is continuously validating the number of positive individuals as reported by the laboratories. When necessary, they are deduplicated. As such, the discrepancy with the number of confirmed cases do not necessarily reflect backlogs in case validation.
2. Please visit [www.doh.gov.ph/covid19tracker](http://www.doh.gov.ph/covid19tracker) for details regarding the testing output per laboratory.

**CONFIRMED CASES BY DATE OF ONSET OF ILLNESS****CONFIRMED DEATHS BY DATE OF DEATH****Notes.**

1. Bars with red colors indicate the actual date of onset or date of death for newly-reported cases.
2. In cases where date of onset of illness is unreported, date of specimen collection was used as proxy. Cases that do not have both are not accounted for in the date of onset histogram. As of this situation report, around 10% of cases have unreported dates of specimen collection and onset of illness.
3. Owing to delays in reporting, case counts after the dashed lines are still incomplete. Hence, we urge caution in interpreting data beyond this date. Rest assured that the DOH continues to work tirelessly to ensure the timely reporting of accurate data.
