

Beat COVID-19 Today

A COVID-19 Philippine Situationer

Issue 75 | July 11, 2020

Total Cases as of 10 July 2020

52,914

+1,233 (848 Fresh, 385 Late)

Active Cases (net of recoveries and deaths)

38,324

+855

Recovered

13,230

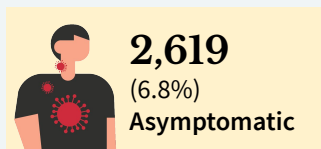

+336

Died

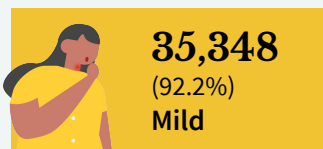

1,360

+42

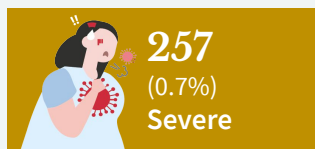

Breakdown of Active Cases

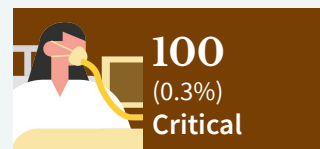

A patient with an RT-PCR confirmed case of COVID-19 without symptoms.

A patient with mild symptoms and stable vital signs. Unless the patient belongs to high-risk subgroups or has comorbidities, they are often not admitted to a treatment facility.

A patient with difficulty breathing, altered mental status, considered high-risk or in need of hospital care.

A patient with impending or ongoing respiratory failure, in need of mechanical ventilation, or with evidence of end-organ damage.

Note. A person who is classified as having a mild case of COVID-19 but is considered high-risk due to age or the presence of comorbidities must be admitted to a treatment facility. Severe or critical cases must be admitted to a treatment facility, regardless of inclusion in high-risk subgroups or presence of comorbidities.

1,391

Probable Cases as of 07 July 2020*

Previously termed as PUIs (mild or critical) with inconclusive or unofficial test results.

**Data as of 11:59 PM, 07 July, 2020 from the DOH DataCollect App*

3,707

Suspect Cases as of 07 July 2020*

Previously termed as PUIs (mild or critical) with no test done or awaiting test results.

Breakdown of cases per region

Top confirmed regions by active cases

| | |
|------------------------------|--------|
| NCR | 14,104 |
| Region VII: Central Visayas | 8,331 |
| Region IV-A: CALABARZON | 1,988 |
| Region III: Central Luzon | 642 |
| Region VIII: Eastern Visayas | 486 |

Top regions by newly-announced fresh cases

| | |
|------------------------------|-----|
| NCR | 405 |
| Region IV-A - CALABARZON | 82 |
| Region VII - Central Visayas | 30 |
| Region III - Central Luzon | 21 |
| Region VI - Western Visayas | 15 |

Top confirmed provinces/ cities by active cases

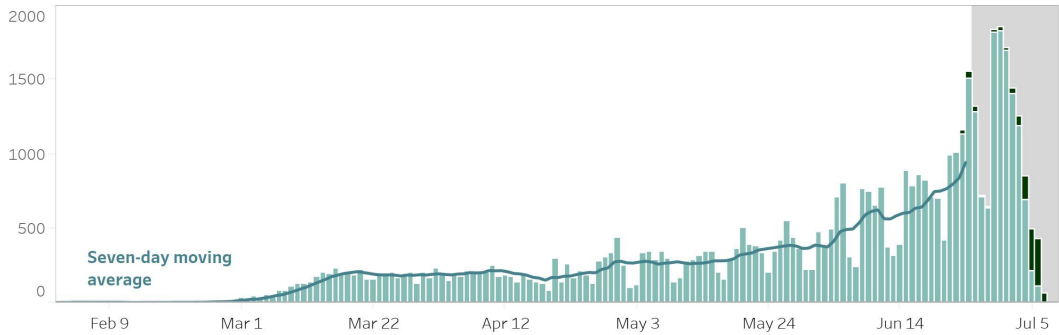

| | |
|----------------|-------|
| Cebu City | 4,523 |
| Quezon City | 2,248 |
| City of Manila | 1,884 |
| Cebu Province | 1,704 |
| Caloocan City | 861 |

Top provinces/cities by newly-announced fresh cases

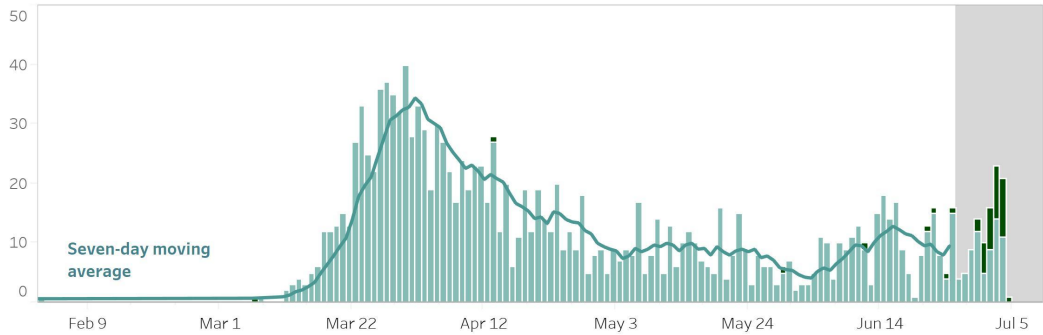

| | |
|-------------------|----|
| Quezon City | 51 |
| City of Manila | 38 |
| Rizal | 32 |
| City of Paranaque | 25 |
| City of Makati | 24 |

Note. Data on healthcare workers affected by COVID-19, testing capacity by laboratory, equipment utilization, and LIGTAS COVID facilities will be included in the full situational report every Sunday.

CONFIRMED CASES BY DATE OF ONSET OF ILLNESS (NATIONWIDE)

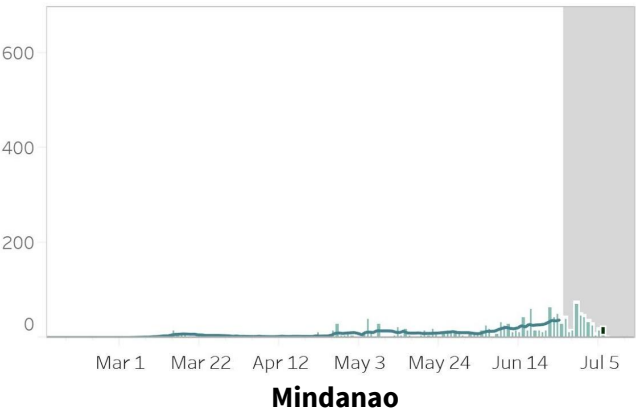

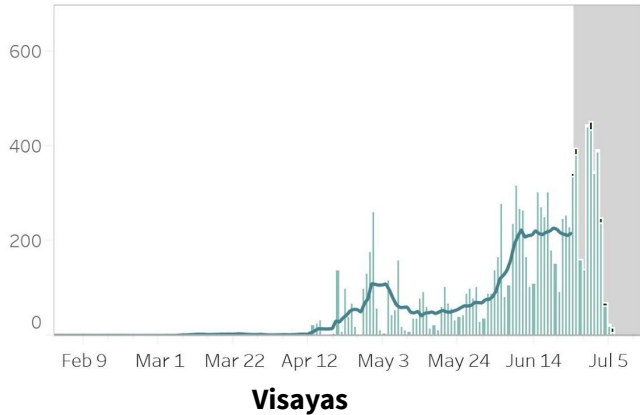

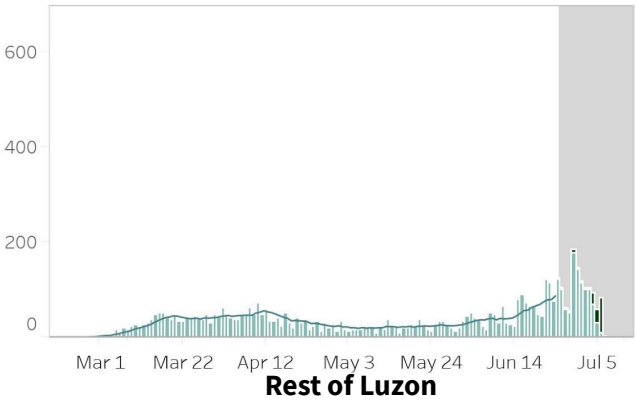

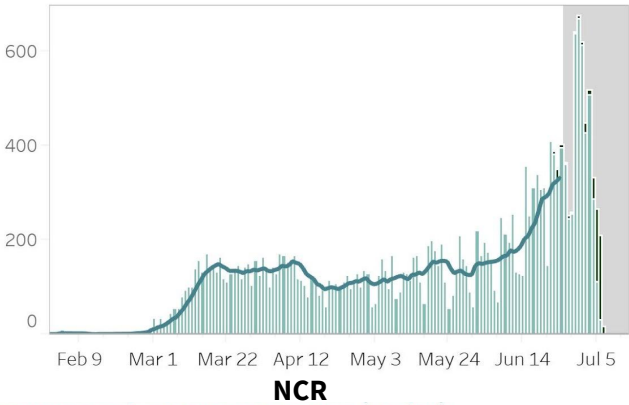

CONFIRMED DEATHS BY DATE OF DEATH (NATIONWIDE)

- Notes.**
- 1. Bars with dark green colors indicate the actual date of onset or date of death for newly-reported cases.
 - 2. In cases where date of onset of illness is unreported, date of specimen collection was used as proxy. Cases that do not have both are not accounted for in the date of onset histogram. As of this situation report, around 10% of cases have unreported dates of specimen collection and onset of illness.
 - 3. Owing to delays in reporting, case counts within the gray area are still incomplete. Hence, we urge caution in interpreting data beyond this 14-day cutoff. Rest assured that the DOH continues to work tirelessly to ensure the timely reporting of accurate data.

CONFIRMED CASES BY DATE OF ONSET OF ILLNESS (DISAGGREGATED)

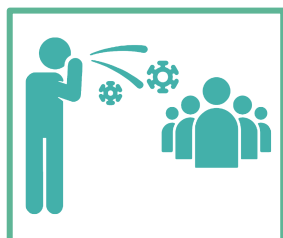

- Notes.**
- 1. Bars with dark green colors indicate the actual date of onset or date of death for newly-reported cases.
 - 2. The cases from the “NCR” graph have been separated from cases of the “Luzon” graph.
 - 3. Owing to delays in reporting, case counts within the gray area are still incomplete. Hence, we urge caution in interpreting data beyond this 14-day cutoff. Rest assured that the DOH continues to work tirelessly to ensure the timely reporting of accurate data.

COVID-19'S CAPACITY TO SPREAD (R_t VALUE)

June 22:

1.23 ± 0.03

Nationwide R_t

The time-varying **reproduction number (R_t)** indicates the possible number of people being infected by a sick person, at a specific time with control measures in place.

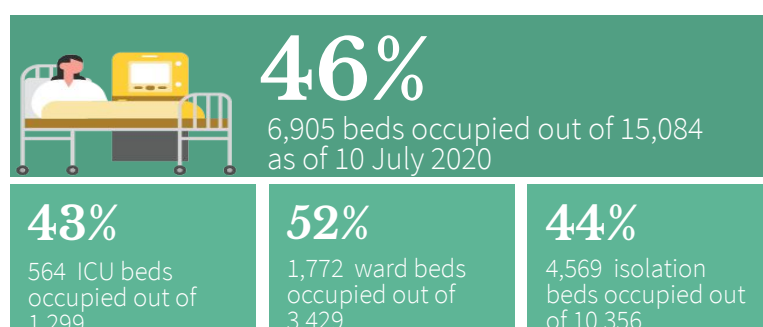

IMPORTANT NOTE. The reproduction number is measured using symptom onset, we do not include in the interpretation the past 14-16 days given the time between symptoms, health seeking, testing, and reporting. When interpreting the reproduction number keep in mind that it is a **lagging indicator**. Please do not expect this number to change daily.

- The reproduction number (R_t) was around 2 early on in the outbreak. This meant that each confirmed person with COVID was infecting 2 other people.
- Based on the latest data, we are 95 percent confident that $R_t = 1.23 \pm 0.03$, which means each infected individual was infecting an average of 1.23 other persons **around two weeks ago**.
- **Lowering this value is made possible through efforts such as social distancing, wearing of PPE, and other means to stop the spread of the virus.**
- The goal is for R_t to be less than 1 and sustain it, which would mean that, on average, an infected person is infecting less than one person, eventually stopping the transmission of COVID-19.

TOP SEA COUNTRIES BY CONFIRMED CASES

| | | |
|--|-------------|--------|
| | Indonesia | 72,347 |
| | Philippines | 52,914 |
| | Singapore | 45,614 |
| | Malaysia | 8,696 |
| | Thailand | 3,202 |
| | Vietnam | 369 |
| | Brunei | 141 |
| | Cambodia | 141 |
| | Laos | 19 |

UTILIZATION OF COVID-19 BEDS

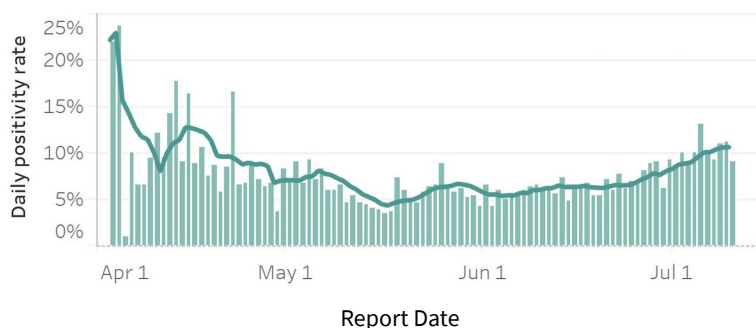

Note. The number of confirmed severe and critical cases may not necessarily correspond to occupancy of ICU beds and mechanical ventilators as suspect and probable cases in severe or critical condition also utilize these resources. Facilities which did not submit a daily utilization report have their most recent carry over to today.

DAILY TESTING STATISTICS AS OF 10 JULY 2020 (FRIDAY)

Daily Testing Output (Nationwide)

Daily Positivity Rate

Daily Testing Statistics as of 10 July 2020 (Friday)

| | |
|---------------------------|--------|
| Samples Tested | 23,016 |
| Individuals Tested | 20,713 |
| Positive Tests | 1,905 |
| Positivity Rate | 9.2% |
| Testing Backlogs | 12,261 |
| Compliance of Labs | 68/74 |

Cumulative Testing Output

| | |
|---------------------------|---------|
| Samples tested | 959,684 |
| Individuals Tested | 890,781 |
| Positive Tests | 69,010 |
| Positivity Rate | 7.8% |

Notes.

1. The DOH is continuously validating the number of positive individuals as reported by the laboratories. When necessary, they are deduplicated. As such, the discrepancy with the number of confirmed cases does not necessarily reflect backlogs in case validation.
2. Please visit www.doh.gov.ph/covidtracker for details regarding the testing output per laboratory.
3. A 6 PM cut-off for the situation report is used, and so the numbers presented here are not yet final. A few laboratories submit data between 6 PM and the time the public data drop is generated.

STATUS OF LABORATORY LICENSING

As of July 10, 2020

| | | | |
|---|---------------------------------------|--|------------------------------|
| 84 | 178 | 157 | 88% |
| NO. OF LICENSED RT-PCR LABORATORIES RT-PCR (63) GENEXPERT(21) | TOTAL NO. OF LABORATORY APPLICATIONS* | TOTAL NO. OF LABORATORIES STAGE 3 AND ABOVE* | % LABS ON STAGE 3 AND ABOVE* |

*Facilities using GeneXpert machines included.

HIGHLIGHTS AND RECENT UPDATES ON COVID-19

As of July 10, 2020

- DOH recorded **38,324 active cases** with the majority of the patients exhibiting **mild symptoms** (35,348; 92.2%) while **100 patients** are in **critical condition** (0.3%).
- DOH recorded **3,643** health care workers positive for COVID 19 of which 2,750 has recovered (75%), 725 (20%) are mild cases, 133 are asymptomatic (43%), 1 severe and 34 (1%) has died.
- Meanwhile, a total of **121,946** Returning Overseas Filipino arrived (Land-based: 54,295; Sea-based: 67,256; 395 transferees from Sabah). Of these, **115,019** were released from facility quarantine (Land-based: 49,811; Sea-based: 65,208). Among the Returning Overseas Filipino, **2,963** were confirmed COVID-19 (Land-based: 1,551; Sea-based: 1,412). Among the confirmed COVID-19 ROF, **725** are currently admitted, **2,202** already recovered; and **1** death reported. Also, the **395** transferees who arrived from Sabah are currently on quarantine.
- A total of **44** remains of deceased OF arrived of which **19** were due to COVID-19.
- A total of **1,398** cases of Filipinos staying overseas who have been tested positive for COVID-19 has been reported to the Department of Health through the Bureau of International Health Cooperation and the Epidemiology Bureau as the Philippines' Focal Point for International Health Regulations. This represents **15 percent** of the total **8,803** confirmed cases reported by the Department of Foreign Affairs (DFA) through the submissions of the Philippine Foreign Service Posts across the world. On the other hand, there are **143** Foreign Nationals (FN-PHs) who have been confirmed of having COVID-19 in the Philippines.
- There are **5,144 Human Resources for Health** hired out of the **8,732** approved slots for emergency hiring in **307** health facilities. Of these, **43.1%** are hired in DOH hospitals, **15.7%** in COVID-19 diagnostic facility, **14.9%** in Temporary Treatment and Monitoring Facility, **10.4%** in LGU and other hospitals, **6.6%** in COVID-19 referral facility, **3.6%** in BOQ managed quarantine facilities and airport units, **3.3%** in private health facilities, **0.9%** in Mega LIGTAS COVID-19 Centers, **0.8%** in Epidemiology and Surveillance Units, and **0.6%** for other healthcare facilities.

Maaari bang malpasa ng nagpapasusong ina na may COVID-19 ang virus sa kanyang baby?

Sa kasalukuyan, wala pang naitala na nakita ang SARS-CoV-2 virus sa gatas ng ina na pinaghihinalaan o kumpirmadong may COVID-19. Sa makatuwid, hindi pa masasabing malpasa ang sakit na COVID-19 sa pamamagitan ng pagpapasa o pagbibigay ng gatas na galing sa ina na pinaghihinalaan o kumpirmadong may COVID-19.

Patuloy pa ring pinag-aaralan ng mga eksperto at mananaliksik ang gatas ng mga inang pinaghihinalaan o naging kumpirmadong may COVID-19.
