Beat COVID-19 Today

A COVID-19 Philippine Situationer

Issue 78 | July 14, 2020

Active Cases as of 13 July 2020 (net of recoveries and deaths)

35,036 -3,554

Total Cases as of 13 July 2020 57.006

Died .599

Breakdown of Active Cases

2,678 (7.6%)

Asymptomatic

A patient with an RT-PCR confirmed case of COVID-19 without symptoms.

(91.5%) Mild

32,057

A patient with mild symptoms and stable vital signs. Unless the patient belongs to high-risk subgroups or has comorbidities, they are often not admitted to a treatment facility.

A patient with difficulty breathing, altered mental status, considered high-risk or in need of hospital care.

A patient with impending or ongoing respiratory failure, in need of mechanical ventilation, or with evidence of end-organ damage.

Note. A person who is classified as having a mild case of COVID-19 but is considered high-risk due to age or the presence of comorbidities must be admitted to a treatment facility. Severe or critical cases must be admitted to a treatment facility, regardless of inclusion in high-risk subgroups or presence of comorbidities.

Probable Cases as of 13 July 2020*

Previously termed as PUIs (mild or critical) with inconclusive or unofficial test results.

38,396

Suspect Cases as of 13 July 2020*

Previously termed as PUIs (mild or critical) with no test done or awaiting test results.

*Includes suspect and probable cases in different health facilities, including the LIGTAS COVID facilities, as reported by the Regional Epidemiology and Surveillance Unit.

Breakdown of cases

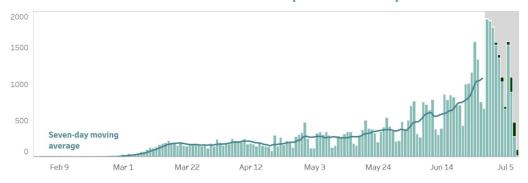

Top regions by active cases

NCR	12,753
Region VII: Central Visayas	7,252
Region IV-A: CALABARZON	2,049
Region III: Central Luzon	696
Region VIII: Eastern Visayas	376
Region VI: Western Visayas	363
Region XI: Davao Region	300
Region X: Northern Mindanao	206
Region IX: Zamboanga Peninsula	195
Region V: Bicol Region	184

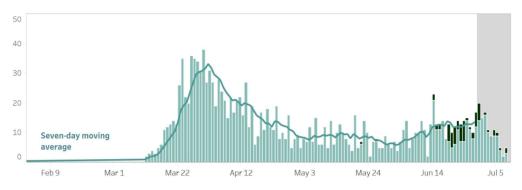

Top provinces/ cities by active cases

Cebu City	3,642
Quezon City	1,698
City of Manila	1,773
Cebu Province	1,573
Lapu-Lapu City (Opon)	831
Mandaue City	775
Caloocan City	700
Taguig City	672
Rizal	545
Laguna	543

CONFIRMED CASES BY DATE OF ONSET OF ILLNESS (NATIONWIDE)

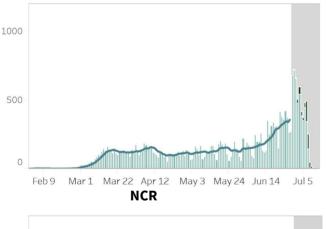

CONFIRMED DEATHS BY DATE OF DEATH (NATIONWIDE)

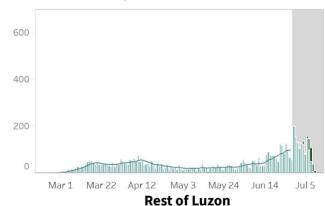

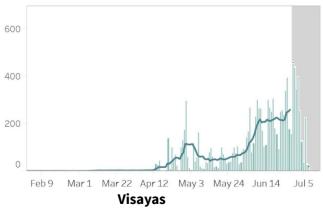

Notes

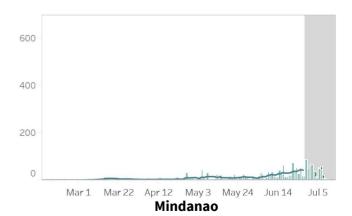

- 1. Bars with dark green colors indicate the actual date of onset or date of death for newly-reported cases.
- 2. In cases where date of onset of illness is unreported, date of specimen collection was used as proxy. Cases that do not have both are not accounted for in the date of onset histogram. As of this situation report, around 10% of cases have unreported dates of specimen collection and onset of illness.
- 3. Owing to delays in reporting, case counts within the gray area are still incomplete. Hence, we urge caution in interpreting data beyond this 14-day cutoff. Rest assured that the DOH continues to work tirelessly to ensure the timely reporting of accurate data.

CONFIRMED CASES BY DATE OF ONSET OF ILLNESS (DISAGGREGATED)

Notes.

- 1. Bars with dark green colors indicate the actual date of onset or date of death for newly-reported cases.
- 2. The cases from the "NCR" graph have been separated from cases of the "Luzon" graph.
- 3. Owing to delays in reporting, case counts within the gray area are still incomplete. Hence, we urge caution in interpreting data beyond this 14-day cutoff. Rest assured that the DOH continues to work tirelessly to ensure the timely reporting of accurate data.

COVID-19'S CAPACITY TO SPREAD (R. VALUE)

June 23: 1.58 ± 0.0 June 24: 1.59 ± 0.03

Nationwide R

The time-varying **reproduction number** (R_{\star}) indicates the possible number of people being infected by a sick person, at a specific time with control measures in place.

IMPORTANT NOTE. The reproduction number is measured using symptom onset, we do not include in the interpretation the past 14-16 days given the time between symptoms, health seeking, testing, and reporting. When interpreting the reproduction number keep in mind that it is a lagging indicator. Please do not expect this number to change daily.

- The reproduction number (R_s) was around 2 early on in the outbreak. This meant that each confirmed person with COVID was infecting 2 other people.
- Based on the latest data, we are 95 percent confident that $R_{\star} = 1.59 \pm 0.03$, which means each infected individual was infecting an average of 1.59 other persons around two weeks ago.
- Lowering this value is made possible through efforts such as social distancing, wearing of PPE, and other means to stop the spread of the virus.
- The goal is for R, to be less than 1 and sustain it, which would mean that, on average, an infected person is infecting less than one person, eventually stopping the transmission of COVID-19.

TOP SEA COUNTRIES BY CONFIRMED CASES

	Indonesia	76,981
*	Philippines	57,006
(::	Singapore	46,283
(* <u></u>	Malaysia	8,725
	Thailand	3,220
*	Vietnam	372
Jafat.	Cambodia	156
-	Brunei	141
	Laos	19

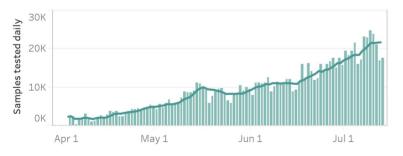

UTILIZATION OF COVID-19 BEDS

Note. The number of confirmed severe and critical cases may not necessarily correspond to occupancy of ICU beds and mechanical ventilators as suspect and probable cases in severe or critical condition also utilize these resources. Facilities which did not submit a daily utilization report have their most recent carry over to today.

DAILY TESTING STATISTICS AS OF 13 JULY 2020 (MONDAY)

Daily Testing Output (Nationwide)

Daily Positivity Rate

Daily Testing Statistics as of 13 July 2020 (Monday)

Samples Tested	17,859
Individuals Tested	16,694
Positive Tests	2,257
Positivity Rate	13.5%
Testing Backlogs	13,457
Compliance of Labs	76/82

Cumulative Testing Output

Samples tested	1,017,723
Individuals Tested	945,146
Positive Tests	75,943
Positivity Rate	8%

- 1. The DOH is continuously validating the number of positive individuals as reported by the laboratories. When necessary, they are deduplicated. As such, the discrepancy with the number of confirmed cases does not necessarily reflect backlogs in case validation.
- 2. Please visit www.doh.gov.ph/covidtracker for details regarding the testing output per laboratory.
- 3. A 6 PM cut-off for the situation report is used, and so the numbers presented here are not yet final. A few laboratories submit data between 6 PM and the time the public data drop is generated.

STATUS OF LABORATORY LICENSING

HIGHLIGHTS AND RECENT UPDATES ON COVID-19

As of 13 July 2020

- DOH recorded **35,036 active cases** with the majority of the patients exhibiting **mild symptoms** (32,057; 91.5%) while **156 patients** are in **critical condition** (0.4%).
- DOH recorded **3,708 health care workers** positive for COVID 19 of which 2,762 has recovered (74%), 768 (21%) are mild cases, 141 are asymptomatic (4%), 2 severe and 35 (1%) has died.
- DOH has deployed 334 post-residency physicians and redeployed 1,329 NDP nurses in DOH and LGU hospitals handling COVID-19 cases. In addition, there are 7,380 NDP nurses deployed in their respective communities who are involved in contact tracing and specimen collection (swabbing) and 3,830 public health associates who play active roles in contact tracing and surveillance.
- A total of 139,992 Returning Overseas Filipino (ROF) have arrived (Land-based: 60,785; Sea-based: 78,812 and 395 transferees from Sabah). Of these, 133,065 were released from facility quarantine (Land-based: 56,301; Sea-based: 76,764). Among the ROF, 3,253 were confirmed COVID-19 cases (Land-based: 1,704; Sea-based: 1,549). Among the confirmed COVID-19 ROF, 708 are currently admitted, 2,401 already recovered; and 1 has died.
- The current **DOH-managed cash for COVID-19** health response is **Php 51.42 billion.** Majority or 89% comes from the supplemental budget for the Bayanihan Act amounting to Php 45.72 billion.
