DEPARTMENT OF HEALTH

Knowledge Management and Information Technology Service

Department of Health Bldg. 9, 2nd Floor, San Lazaro Compound Rizal Ave Manila

IV. Background and Rationale:

Internet connectivity is at the core of DOH operation to run mission-critical business applications that drive productivity and delivers public service. Internet access is a major component of DOH overall network infrastructure that must be highly reliable and always available. This is a significant initiative from DOH which is closest to the public in terms of health service, health information and dissemination and this accomplishment places DOH in an advanced position on Philippines e-Government map.

Currently DOH existing setup is a redundant Internet Link Load Balancer (ILLB) that host DOH Internet Service Providers (ISP), ASTI-DOST, Eastern Telecoms, Converge and PLDT. The ILLB will automatically transfer DOH internet traffic to a much better link and that is not congested whenever any of the four ISP encounters problem or goes down. This ensures DOH internet connection up and running and with no down time that will affect DOH critical services

The hardware warranty, software and licenses of one of DOH Internet Link Load Balancer expired last 07 February 2023. To ensure stability and continuous operation of DOH internet connections/links without interrupting DOH mission critical services, this TOR provides prospective contractors a general understanding of the requirements for the proposed renewal of support and services of Internet Link Load Balancer.
